### LATEST COMMENTARY

The year 2023 proved once again that the pursuit of broad market predictions often proves to be a futile endeavor. It further reinforced our pragmatic approach focused on investing in highly mispriced yet high-quality businesses with strong pricing power and properly incentivized management team, rather than attempting to predict broad market movements. High-quality businesses typically possess robust business models, strong market positions, and the ability to generate consistent earnings.

### ANNUALIZED PERFORMANCE NET OF FEES

### NET LONG SECTOR ALLOCATION

### LONG/SHORT EQUITY STRATEGY

#### LONG POSITIONS

On the Long side we invest in companies that demonstrate high quality characteristics, fall within our circle of competence and sell at a discount to intrinsic value.

On the Short side we look for companies that exhibit traits of systematic under performance and which provide excellent risk management characteristics at the same time.

#### SHORT POSITIONS

Disclaimer: This document does not represent an offering of securities in any jurisdiction and is for informational purposes only. The securities described herein are only available to Accredited Investors and Institutional Investors in Canada by private placement in accordance with applicable securities laws. The information disclosed in this summary is incomplete, and is qualified in its entirety by the Offering Memorandum for the LionGuard Opportunities Fund LP and the Trust wrapper as warranted. The data for Scotia Canadian Hedge Fund Index & HFRI Equity Hedge Total Index is the latest available. Fund's returns have been calculated by Fund Administrator, are net of all fees. Note that for the period of October 2014 to November 2016, the performance is based on Class S units with adjustment to 1.0% base management fee. LionGuard Capital Management Inc. does not warrant the accuracy of the presented information nor is responsible for any actions taken as a result of this report. Long exposure, short exposure, and net long exposure data maybe adjusted for confirmed inflows and outflows. Upside capture ratio (downside capture ratio) is computed using the average monthly returns for the fund divided by the average monthly returns for the benchmark when the benchmark returns are positive (negative). The indicated rates of returns are historical returns based on changes in values of applicable class of units and do not take into account sales, redemption, distribution, or optional charges or income taxes payable. LionGuard Opportunities Trust Fund invests its capital into the LionGuard Opportunities Fund LP. Some of the assumptions or opinions contained herein are the views or opinions of the firm and are based on management's analysis of the portfolio performance.
