LATEST COMMENTARY

At LionGuard, we invest across numerous U.S.-listed businesses that stand to benefit tax reductions, deregulation, and incentives for domestic investment. Additionally, we favor Canadian-listed companies with large U.S. revenues. These businesses are well-positioned to capitalize on pro-business tailwinds south of the border, are largely insulated from tariff-related matters, and are also increasingly attractive acquisition targets for U.S. firms, given the strength of the U.S. dollar relative to the Canadian dollar.

LONG/SHORT EQUITY STRATEGY

LONG POSITIONS

On the Long side we invest in companies that demonstrate high quality characteristics, fall within our circle of competence and sell at a discount to intrinsic value.

On the Short side we look for companies that exhibit traits of systematic under performance and which provide excellent risk management characteristics at the same time.

Disclaimer: This document does not represent an offering of securities in any jurisdiction and is for informational purposes only. The securities described herein are only available to Accredited Investors and Institutional Investors in Canada by private placement in accordance with applicable securities laws. The information disclosed in this summary is incomplete, and is qualified in its entirety by the Offering Memorandum for the LionGuard Opportunities Fund LP and the Trust wrapper as warranted. The data for Scotia Canadian Hedge Fund Index & HFRI Equity Hedge Total Index is the latest available. Fund's returns have been calculated by Fund Administrator, are net of all fees. Note that for the period of October 2014 to November 2016, the performance is based on Class S units with adjustment to 1.0% base management fee. LionGuard Capital Management Inc. does not warrant the accuracy of the presented information nor is responsible for any actions taken as a result of this report. Long exposure, short exposure, and net long exposure data maybe adjusted for confirmed inflows and outflows. Upside capture ratio (downside capture ratio) is computed using the average monthly returns for the fund divided by the average monthly returns for the benchmark when the benchmark returns are positive (negative). The indicated rates of returns are historical returns based on changes in values of applicable class of units and do not take into account sales, redemption, distribution, or optional charges or income taxes payable. LionGuard Opportunities Trust Fund invests its capital into the LionGuard Opportunities Fund LP. Some of the assumptions or opinions contained herein are the views or opinions of the firm and are based on management's analysis of the portfolio performance. The data presented in the graph includes the full dataset, even though the bottom axis is labeled with an earlier endpoint due to formatting constraints. The analysis reflects all available data beyond the labeled range.
